SMT Mount Accelerometer

Piezoresistive MEMS

Temperature Calibrated

Hermetically Sealed

DESCRIPTION

The Model 4650 is a signal conditioned board mountable MEMS accelerometer. The accelerometer incorporates integral temperature compensation and a frequency response from DC to 1500Hz. The gas damped accelerometer incorporates integral over-range stops making it ideal for measurements of static and dynamic vibrations after shock impacts in applications such as weapons development, impact testing, and guidance systems. The model 4650 is packaged in a true hermetically sealed envelope with a ceramic board and a metal shielding for SMT or adhesive mounting.
