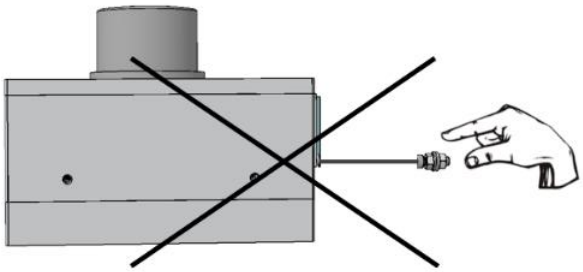
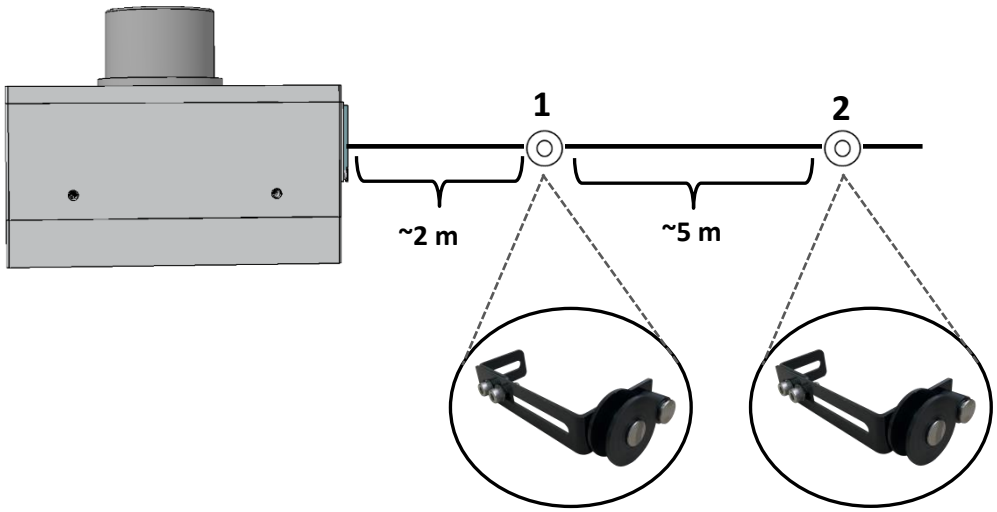
1. Never release the wire after pulling. Otherwise, the coil spring will be damaged.



2. In order to prevent the cable from sagging over long distances, the cable carrier rollers supplied with the product should be used at regular intervals. It is recommended that the first carrier roller to be used after the sensor is used approximately 2 meters from the body, and the other carrier rollers are used every 5 meters on average.
Note: Carrier rollers will be given in the package according to the order quantity.



Important Note(!): Failure to comply with these recommendations, the malfunctions that may occur will not be under the warranty.
