

## LCD20 – Frequently Asked Questions

### Question 1

Can the LCD20 perform the same functions as the LCA20?

#### Answer

The LCD20 has most of LCA20's functionality. However, there are a few exceptions. The differences are as follows:

- The LCD20 does not have an on board display option
  - The LCD20 has two configurable digital inputs
  - The LCD20 is rated as IP20
  - The LCD20 runs on a DC power supply
  - The LCD20 does not have the on board RS485/RS232 communication outputs (this is the LC4 module on the LCA20)
  - On the LCD20, both the 4-20mA and 0-10V (analogue outputs) are factory calibrated
- 

### Question 2

Is the LCD20 toolkit software similar to the LCA20 toolkit?

#### Answer

Yes, the navigation of the two is identical and the same user-friendly graphical interface is still in place. The software is still free of charge and can be downloaded from the Mantracourt Website.

<http://www.mantracourt.com/software/>

The differences in the two toolkits are only as a result of the difference in the functionality between the products.

---

### Question 3

How do you configure the LCD20?

#### Answer

This can be done by either using the PGM1 cable and Toolkit or the remote handheld programmer (LP2)

---

### Question 4

Can the LCD20 provide readings in tension and compression?

#### Answer

Yes

---

**Question 5**

How can I connect to a LCD20 without knowing the baudrate and station number?

**Answer**

Behind the front panel is a small red button, if you press connect in the LCD Toolkit and press the red button it will auto connect to the module.

-----

**Question 6**

Can you tell if the calibration has been changed on the LCD20?

**Answer**

Yes, in the calibration menu you can view the last calibration date and calibration counter.

## Distribuidor

**Brasil e América do Sul**
