SD20p-USB Quick Start Guide

1. Software install (Windows operating system)

Download SD20-Datalogger software from

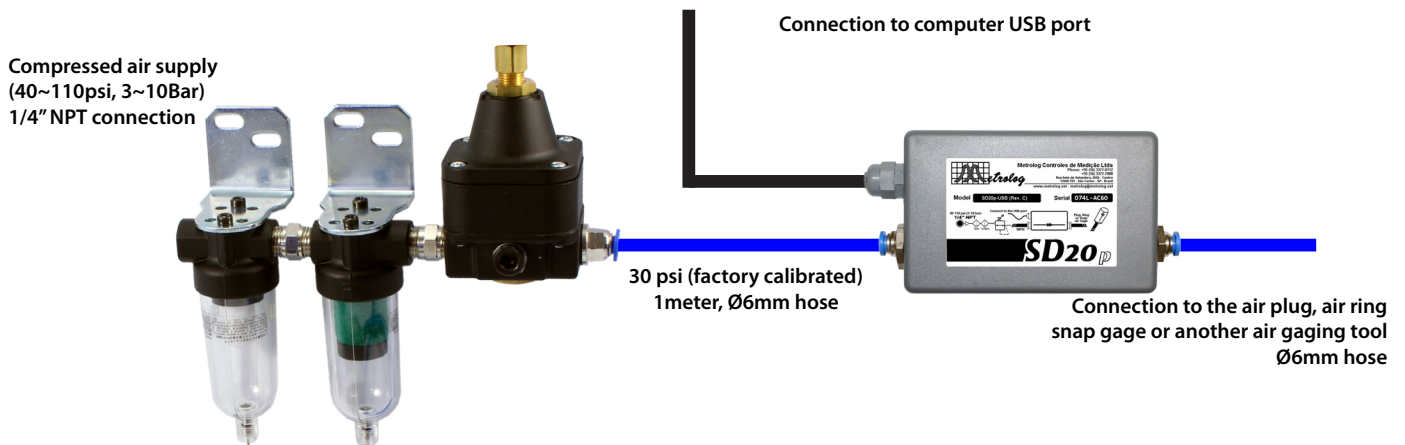

www.metrolog.net/sd20p

Note: Administrative privileges are required for USB driver installation.

2. Connect SD20p-USB to USB port

Connect the SD20p-USB conditioner to the computer.

The operating system will identify the new device and automatically install the necessary drivers. Check air and gage connections (refer to manual for details).

3. Start SD20 DataLogger software

SD20-Datalogger software will automatically detect the new SD20p-USB connect to the system and start data visualization. Use the calibration and zero functions to proper measurement setup. For details refer to SD20p manual available at

www.metrolog.net/sd20p
